

Speaker Bio

Dr. Wanda Wagner

Dr. Wanda Wagner has over 30 years' experience in educational technology, currently at ACES. She has ten years of teaching experience at the University of Maryland Global Campus' doctoral program. She has developed and taught courses in the area of educational technology, environmental scanning, learning communities, rapid evidence assessments, systematic reviews of literature, qualitative data analysis, and innovation theory and process. Wagner has several lines of participatory action research: communication channels between information technology and end users; innovation diffusion; technology transfer; distributed leadership through professional learning communities; evidence-based management; and distributed intelligence. She was a 2014 fellow for the Education Policy Fellowship Program and continues her advocacy from her fellowship in digital citizenship.
